

cascade Filtration Drinking Water System

- **Simple to Use**
The sealed filter cartridges facilitate easy, hygienic filter replacements.
- **1700 Gallons of Great Tasting Water**
The Cascade will produce up to 1700 gallons before a filter change is required.
- **High Capacity Prefilter**
Removes dirt, rust and other suspended solids.
- **GAC filters**
Dual carbon (GAC) filtration removes chlorine taste and odor.
- **Complete System** includes Cascade unit, stainless-steel non-airgap faucet and installation hardware.

Replacements	Part #
Sediment prefilter	104955
GAC Filters (2 per system)	104956

Typical Installation Diagram

- A. Blue feed water tubing
